February 19, 1969

Dr. Josuah Lederberg
Professor of Genetics
Stanford University Medical Center
Stanford, California 94305

Dear Dr. Lederberg:

Dr. Maurice R. Green was kind enough
to show me a copy of your letter to him concerning
Clara Thompson's work.

For all of us here who try to make
psychoanalysis meaningful within this same frame of
reference your letter is most heartening. Would you
be interested in having copies of other papers within
the same framework?

We have long been concerned with
effecting a working relationship with professionals
who are interested in, if you will, the sciences of
man or the sciences of men. I wonder if you would be
willing to have some informal talks with us when and if
you ever get to New York.

Sincerely yours,

Earl G. Witenberg
